Big Savings with High Speed Internet!

We would like to take this opportunity to provide you with a few quick updates, some exciting announcements and some money saving tips for you to take advantage of now that you have high speed broadband service.

FB Fiber Secures Grant for Expansion

Earlier this year we applied for a USDA grant to build fiber optic internet to the Laurel, Revere and Spillcorn areas of Madison County. There were over 120 applications submitted across the United States and we are pleased to announce that we have been awarded this grant. We plan to begin fiber construction into the above-mentioned areas early next year. A map of the new area, as well as our other service areas, may be found here: <https://www.frenchbroadfiber.com/coveragemap.cfm>

FB Fiber Phone Service is here!

Why pay Frontier for the exact same service we offer at a fraction of the cost? Our new phone service is now available to all of our current fiber customers for less than \$20/month including taxes and fees!

Several customers have already taken advantage of this money saving service and the feedback has been excellent. Customers have reported clearer calls and are especially pleased with the money savings. Some of the highlights of our new phone service include:

- Keep your current local phone number at no additional cost
- All common calling features such as: call waiting, caller ID, call blocking, voicemail and much more
- Unlimited long distance included (All 50 States + Canada)
- Substantial cost savings over traditional phone service
- No additional equipment to buy, just plug your telephone into the phone port on the back of your wireless router
- The option to get a new local number and have service activated on the same day

Call us at 649-2051 or [email us](#) today to get started!

Save \$\$ with Internet TV Options

You may know and love services like Netflix but did you know you can also watch regular TV channels through your Internet service? While FB Fiber does not offer TV service ourselves, our high speed Internet gives you the ability to use several Internet based TV services.

Living in a rural area means we usually have to pay extremely high prices for satellite based TV since it is our only option. However, more recent offerings from [YouTubeTV](#), [DirecTV Now](#), [Hulu](#), [Sling](#) and [PlayStation Vue](#) can provide you with local channels and all your other favorite channels for as little as \$40/month. We recommend checking out [this informative article from PC Magazine](#) comparing all of the most popular services. All you need to enjoy these offerings is a web browser, a streaming device like a [Roku](#) or [Amazon Fire TV](#), an Xbox or PlayStation, and certain Smart TVs. We suggest the Roku Ultra or Amazon Cube for the best results.
